*“ We have strived hard for past 5 years to guide Young Doctors from across the country. Our website has been immensely successful and has been visited by more than 3 lakh doctors from around the country and abroad. During this period we realized that many are in need of guidance during their Residency but seldom get the right advice due to paucity of free time. So we plan to bring short, high quality academics to fast forward your career. This endeavour also marks our **5th Anniversary** as we extend our guidance and support to young doctors academically.”*
